

I am pleased to note that the recent *Text und Textwert* for the Apocalypse (2017) recognizes their Complutensian text as an independent line of transmission, along with the so-called Koine and Andreas texts. Their Complutensian is my Family 35; it corresponds to group c below. Their Koine corresponds to groups a, b, f, g, i below. Their Andreas corresponds to groups d, e, h below—well, that is to say, according to my evaluation. As you can see below, there is a good deal of ‘promiscuity’, the individual groups move around, some more than others. The most difficult case is h, that goes with the Koine almost as often as with Andreas.

Based on my analysis of Hoskier, the groups have the following ‘size’: a is represented by 65 MSS; b by 10; c by 33;¹ d by 15; e by 31; f by 11; g by 9; h by 13; i by 11. (a alone is larger than b, f, g, i combined.) (d is smaller than e, but e is by far the most fragmented group.)² Since I consider c to be the common denominator, I place it first; a leads the Koine and d the Andreas. Only combinations are listed; each group occurs by itself as well.

¹ I have added 10 MSS to the 33, based on research I did at the INTF. Of the 43, one is a mere fragment, but it contains the first diagnostic family reading.

² I should mention that Hoskier collated 14 MSS that I have not included in the nine groups (for various reasons). If they do not belong to a line of transmission, nor themselves form a separate group, they are irrelevant.
