Should anyone wish to claim that **f**³⁵ is a recension, I request (and insist) that he specify who did it, when and where, and furnish evidence in support of the claim. Without evidence, any such claim is frivolous and irresponsible.

So why don't we have **f**³⁵ MSS from before the 11th century? Well, why do you suppose that with few exceptions only **f**³⁵ MSS have the Lections marked in the margin? Could it be because the Greek speaking communities used them in their worship services and for reading at communal meals? And what effect does constant use have on any book? I suggest, for the calm, cool and collected consideration of all concerned, that any worthy MSS would be in constant use, and therefore could not survive for centuries. Copies that were considered to be of unacceptably poor quality would be left on the shelf to collect dust, and they are the ones that survived.

However that may be, I invite attention to the following list of **f**³⁵ MSS from the 11th century:

The MSS within () appear to be marginal members of the family, or are mixed. To begin, we note that there are 18 MSS listed, and each in a distinct location (of course, some of those presently in Western Europe may have been acquired from the same monastery). Further, since they are
