With four exceptions, only a single letter or syllable is involved, and nowhere is the meaning seriously affected. If the missing pages were available and collated, a number of variants would presumably be added, but they would not differ in kind from the rest. **Someone reading MS 1384 would not be misled as to the intended meaning at any point in the book.** I say this is noteworthy, and it is typical of almost all f<sup>35</sup> MSS. Down through the centuries of transmission, anyone with access to a f<sup>35</sup> representative could know the intended meaning of the Autograph.<sup>1</sup> Not only that, most lines of transmission within the Byzantine bulk would be reasonably close, good enough for most practical purposes. This is also true of the much maligned *Textus Receptus*; it is certainly good enough for most practical purposes. Down through the centuries of Church history, most people could have had reasonable access to God's written revelation.

<sup>1</sup> Since f<sup>35</sup> MSS are scattered all over, or all around, the Mediterranean world, such access would have been feasible for most people.
