So what can we learn from this evidence? To begin, the sole underlined MS that appears in the chart, 607, is the only one of the five core representatives to appear, and it does so only once. This shows clearly that **f**³⁵ is distinct from the Byzantine bulk, or Soden's **K**^x. Further, there are 43 MSS that are alone in attesting a **f**³⁵ reading: A, C, 81, 104*, 436, 459*,
