I consider that these seventeen MSS represent a significant sub-group that is distributed throughout the four larger books. Observe that the geographical distribution is limited; Constantinople, Jerusalem, Patmos, Trikala and seven of the ten (that I checked) Mt. Athos monasteries are missing (of the twenty M Lavras MSS only three are here). The probability that this group could represent the archetype is negligible. I now add the ‘stragglers’, to complete the picture for each variant.

801, 1250, 1876 and 2626 may well have shared a common influence.

To these the following ‘solitaries’ should be added: for James 2:13 add 1636, 1725, 1897, 2080; for James 2:14 add 141, 1656, 1746, 2501; for 1 Peter 2:24 add 1768; for 1 Peter 3:6 add 1618, 1637, 1732, 2777; for 1 Peter 5:8 add 1761; for 2 Peter 2:14 add 1726, 2261, 2378; for 2 Peter 3:3 and 1 John 4:20 there are none.

Comment: $\epsilon\eta$ in James 2:14 is attested by 36 MSS, over 40% of the Family. Besides dittography being an easy possibility, the pressure of $\mu\eta$ may have caused some copyists to put the Subjunctive, perhaps without thinking—the reverse change would presumably be deliberate. In the context the Indicative is correct: James is stating a fact, the person does not have works.
