

2261	Kalavryta	XIV	[2378]	Athens	1511 ¹
2466	Patmos	1329	2554	Bukarest	1434
2626	Ochrida	XIV	2723	Trikala	XI

A chart will help to visualize the distribution for the two variants, using ‘Mt. Athos’ and ‘elsewhere’:

	<u>Indicative</u>	<u>Subjunctive</u>	<u>both</u>
1) Mt. Athos:	Konstamonitu Kutlumusiu Philotheu	Esphigmenu Ivion Kavsokalyvia Stavronikita	Dionysiu M Lavras Panteleimonos Vatopediu
2) elsewhere:	Bologna Bukarest Constantinople Grottaferrata Kalavryta Ochrida Patmos Sparta Trikala	Karditsa Leiden Lesbos London Meteora Sofia Vallicelliana (Rome) Zittau	Athens Jerusalem Paris Sinai Vatican

Sinai, Jerusalem, Mt. Athos and Vatican are on both sides, but the Indicative has the better distribution elsewhere, significantly better.

In “Adjudicating Family Splits”,² based on 24 MSS, the Subjunctive was attested by 59% of that selection, but my weighting instrument reduced the value to 43%. This paper is based on 77 MSS (out of 84 known family members) and the Subjunctive is now attested by 61% of the 77—the picture has not changed. I am cheerfully satisfied that the archetype read the Indicative.

Returning to the list of fourteen splits on the first page, it will be observed that almost all of them involve a single letter, or similar sounding diphthong. Most of them represent scarcely any difference in meaning. There simply is no significant variation anywhere in Family 35 throughout the seven General Epistles. God has preserved His Text.

¹ 2378 is missing the first sheet of 1 John, and hence the verse in question, but since it eschews both sub-groups throughout, it almost certainly read the Indicative here.
