

M- = plurality = marginal
M/E = a tie

I assume that Aland will agree with me that E + M is certainly original, so the “both” column needs to be disregarded as we try to evaluate the tendencies of the several MSS. Accordingly I considered only the “Egyptian”, “Majority” and “other” columns in calculating percentages.

Codex	Date	cont.	Egypt.	Both	Major.	Other	total	class.	Cat.

500

¹ The history of the place where Codex W was found suggests that it must have been copied before AD 200, which would put the Byzantine Text in the second century.
