900

(*Aland shows **ap**, but gives no figures for **a**.)

So, what can we learn from this chart? Perhaps a good place to begin is with a correlation between “Cat.” and “class.” in terms of the values we have each given to specific MSS:

<u>I</u>	<u>II</u>	<u>III</u>	<u>IV</u>	<u>V</u>
E++	E+++ M- O-	E+ M++	O-	M+++++
E+	E+	E M		M++++
E	E	E- M-		M+++
	E-	E/M		M++
				M+

Categories I, IV and V are reasonably consistent, but how are we to interpret II and III? This is bothersome because in Aland’s book (pp. 156-59) a very great many MSS are listed under III and not a few under II. It
