

++--	27:35	βαλοντες [25%] βαλλοντες f ^{35pt} [75%]
+-	27:55	και [35%] --- [65%]
++--	27:64	οτι [25%] --- [75%]

Key:

+++	around 20% = f ³⁵ virtually alone = diagnostic (17)
++--	around 25% = quite good (22)
++	around 30% = not bad (34)
+-	around 35% (10)
+	around 40% (9)

Total: 92

A single diagnostic reading could be happenstance, but several presumably indicate that the MS is at least a fringe member of the family. Probably no two scholars would prepare identical lists—changing rank, adding or subtracting—but there is sufficient evidence here to establish that f³⁵ is a distinct family. The statements here apply to the remaining books as well.
