The evidence is clear. **Family 35** is an objectively/empirically defined entity throughout the New Testament. It remains to be seen if the same can be said for any other family or line of transmission—attention please: that is for all 27 books (a number of lines are confined to the Gospels, such as **f**¹ and **f**¹³).

Family 35 is characterized by incredibly careful transmission (in contrast to other lines). I have a perfect copy of the Family 35 archetypal text for most NT books (22); I have copies made from a perfect exemplar (presumed) for another four (4); as I continue to collate MSS I hope to add the last one (Acts), but even for it the archetypal form is demonstrable. If God was preserving the original wording in some line of transmission other than Family 35, would that line be any less careful? I think not. So any line of transmission characterized by internal confusion is disqualified—this includes **all** the other lines of transmission that I have seen so far.
